

Australian Toll Roads

You will likely encounter toll roads if you are driving through Metropolitan New South Wales, Victoria and Queensland. A toll is charged each time the toll road is used. When driving a **thl** rental vehicle in Australia, you are responsible for the costs of the toll charges, so it is important to be aware of these roads before you travel. Please refer to the maps below of all Australian toll roads. These toll roads are electronically tolled, which means you will not be able to stop and pay cash.

All **thl** vehicles are registered for automatic tolling, which means you don't need to do a thing. If you drive on a toll road, the toll charge will be paid by **thl** and **thl** will then charge the credit card that is on file for your booking for the toll charge, along with an administration fee per toll.

thl will send you an email confirming the cost of the toll and the time and date when you travelled on any toll road.

Please note that each State classifies our campers differently. The cost of the toll applicable to your hire depends on the vehicle's class, the distance you travel and the state you travel in. For further information on vehicle class, please visit the following Linkt Websites:

linkt.com.au/help/travelling-toll-roads/vehicle-class/melbourne
linkt.com.au/help/travelling-toll-roads/vehicle-class/sydney
